

Update on Construction Activity in North Coyote Valley

You may have noticed that construction is currently underway in North Coyote Valley on both sides of Santa Teresa Boulevard, northerly of Bailey Avenue, and southerly of Tulare Hill. The construction **is not** related to the pending Coyote Valley Specific Plan planning process. The construction is being carried out in accordance with the terms and conditions of the previously approved Coyote Valley Research Park (CVRP) project (Permit File No. PDA00-021-01). It consists of grading, drainage, and flood control improvements for a Fisher Creek bypass channel as approved in (04/23/2004). The project also has approved permits from the appropriate Federal and State agencies. The work **does not** include the construction of any new buildings. If you have any questions regarding the current construction in North Coyote Valley please contact Jared Hart at (408) 535-7904.
