An HCP/NCCP is a comprehensive plan to preserve identified endangered species and natural communities. Four Local Partners are working together to create a Plan for Santa Clara Valley. You may have heard about the Plan. Now you can learn more about the preparation work we have been doing the last two years and the work we anticipate doing with the community for the next three to five years.

Please join us to receive introductory information, ask questions and provide initial comments regarding the preparation of the Santa Clara Valley Habitat Conservation Plan and Natural Community Conservation Plan. We also want to celebrate the recent public release of our Draft Planning Agreement with the California Department of Fish and Game and the United States Fish and Wildlife Service.
